HR Analytics Dashboard — Project Documentation

1. Project Overview

The HR Analytics Dashboard is created using Microsoft Excel to analyze employee data and understand workforce patterns. It presents key metrics and visualizations related to employee attrition, gender, education, job roles, age groups, and marital status.

The dashboard provides a clear overview of employee information and helps HR teams identify areas that may require further investigation.

2. Project Objectives

- Analyze employee attrition and workforce patterns.
- Compare employee counts by gender.
- Understand attrition across education levels and departments.
- Analyze attrition by job role, age group, and marital status.
- Present important HR metrics in an interactive dashboard.
- Support data-driven HR analysis and decision-making.

3. Key Performance Indicators

Metric	Value
Total Employees	1,470
Attrition	237
Active Employees	1,233
Attrition Rate	16.12%
Average Age	37 years
Job Satisfaction Rating	2.6

4. Dashboard Components

Total Employees by Gender

Compares female and male employee counts. The dashboard displays 588 female employees and 882 male employees.

Education-Wise Attrition

Displays attrition counts by education level, including Bachelor's Degree, Master's Degree, Associate's Degree, High School, and Doctoral Degree.

Attrition by Job Role

Uses a treemap to compare attrition across different job roles, such as Laboratory Technician, Sales Executive, Research Scientist, and Sales Representative.

Department-Wise Attrition

Shows the distribution of attrition across HR, R&D, and Sales departments.

Attrition by Age Group

Compares attrition counts across five age groups: Under 25, 25–34, 35–44, 45–54, and Over 55.

Attrition by Marital Status

Displays attrition counts for married, single, and divorced employees.

5. Interactive Filters

The dashboard includes filters for gender, education field, and department. These filters allow users to explore different employee groups and compare workforce patterns.

6. Tools Used

- Microsoft Excel
- Data visualization
- Charts and interactive filters

7. Business Value

The dashboard helps HR teams monitor attrition, compare employee groups, and identify areas that may need further attention. These insights can support employee retention planning and workforce analysis.

8. Conclusion

This project demonstrates how Microsoft Excel can be used to present HR data through KPI cards, charts, and interactive filters. It converts employee information into a clear visual report that supports workforce analysis and informed decision-making.
